Loans to veteran-owned businesses

Opportunity Finance Network (OFN) is a national network of community development financial institutions (CDFIs) investing in opportunities that create economic growth and stimulate the flow of entrepreneurial capital in urban, rural, and Native communities.

Our network includes more than 230 CDFIs. In order to join our network, CDFIs must meet OFN's performance expectations, which include providing access to responsible, affordable capital, and effectively deploying resources to the communities in which we operate.

OFN members finance community businesses, spark job growth in the areas that need it most, and deliver both sound financial returns and real changes for people and communities.

In 2015, OFN's members achieved their results with a net charge-off ratio of just 0.44%, matching that of FDIC-insured institutions.*

Our members partner across the public and private sector—with government agencies, foundations, corporations, and traditional financial institutions—to provide innovative solutions that deliver access to capital and that enable CDFIs to leverage that capital into larger investments. This results in billions of dollars of private investment and new opportunities.

OFN is also a U.S. Department of Treasury-certified CDFI and intermediary lender - providing flexible, affordable capital to members of our network. Our loan portfolio currently has more than \$300 million in loans outstanding to CDFIs.
